Professional Summary

Highly motivated BS Computer Science graduate with hands-on internship experience and a strong enthusiasm for coding, problem-solving, and technology-driven innovation. I am fully prepared to step into a professional Software Developer role. Eager to bring a proactive mindset and foundational development skills to a collaborative engineering team

EDUCATION

Bachelor of Engineering in Software Engineering 2022 – 2026
Lahore Garrison University

Intermediate (Pre-Engineering) 2020 – 2022
Garrison College Lahore

Matriculation 2018 – 2020
National Public School

WORK EXPERIENCE

- Frontend Web Developer Intern** Aug 2025 – Sep 2025
TBox Solutionz (SMC-PVT) Limited | Lahore, Pakistan
Developed a full-featured Image Editor Web Application leveraging React.js for the front-end interface and PHP for server-side functionality, delivering an interactive and user-friendly editing experience.
- Frontend Web Developer Intern** Aug 2024 – Oct 2024
TBox Solutionz (SMC-PVT) Limited | Lahore, Pakistan
Built dynamic and responsive front-end components using React.js, contributing to improved user interface interactivity and overall application performance.
- Frontend Web Developer Intern** Jul 2023 – Sep 2023
TBox Solutionz (SMC-PVT) Limited | Lahore, Pakistan
Developed and structured web pages using HTML and CSS, establishing a strong foundation in front-end development principles and responsive design practices.

PROJECTS

- AI Buraq Pilgrim**
MERN Stack | 2026
Hajj & Umrah platform enabling users to upload documents, track journey, submit travel stories, and interact with an AI-powered chatbot for guidance.
- Hajj & Umrah Website & Desktop App**
React.js / Node.js / MongoDB / Express / Tailwind / APIs | 2026
Complete Hajj & Umrah management solution with flight & hotel API booking, custom packages, user tracking, document upload, and a dedicated agent desktop app for managing hotels, visas, transport and auto-generating packages.
- Institutional Education Portal | 2025**
Frontend: React.js, Tailwind CSS | Backend: Node.js, Express, MongoDB
Designed and engineered a responsive full-stack web platform optimized for displaying academic insights, real-time institutional announcements, and administrative details. Leveraging the MERN stack, the application combines a highly structured database with a modern, user-centric interface to ensure rapid content delivery and an optimal user experience.
- Image Editor**
React.js / PHP / Tailwind | 2025
Web-based image editing tool supporting background removal, grayscale effects, color adjustments, background setting, and blurring with real-time processing.
- GitHub Finder**
React.js / Node.js | 2024
Application to search GitHub profiles by ID, fetching and displaying user details, repositories, and activity.
